

CATA LO GUE

2018-2019

WHO WE ARE

Since 1978, Frutos del Maipo has been a leading frozen vegetables company in Chile, managed by a committed team with clear focus in innovation and quality. It has its roots in the Chilean agricultural tradition which, combined with the best process equipment and agronomist knowledge, makes possible the delivery of a diverse and high quality range of products. In 2014, Frutos del Maipo was acquired by Watt's S.A, a US\$700MM sales company that is among the top 3 largest food companies in Chile with presence in Dairy, Edible Oils, Fruit based products and Frozen Foods.

FRUTOS DEL MAIPO IS YOUR PERFECT FROZEN VEGETABLES AND FRUITS PARTNER IN THE NEW WORLD

Why Frutos del Maipo?

- We have a capable and motivated team of great people behind our products.
- We are experts in what we do, from the crop to store aisles.
- We are flexible and understand our customer's needs to deliver superior solutions.
- We respect the environment and our stakeholders.
- We ensure that our products meet the highest safety and quality standards.
- We are always searching new technology and innovation to offer the best costs.

Our relationship with Agriculture

Our team of 10 qualified agronomists work on a weekly basis with more than 130 farmers who grow approximately 3.500 hectares of exclusive crops for Frutos del Maipo. We limit our crops to plant distance at a maximum of one hour, to ensure the freezing process occurs in the shortest possible time, ensuring that the goodness of our products is maximized and preserved.

PRODUCTION, PACKING AND DISTRIBUTION

CHILE

BUIN PLANT

Close to Santiago, the main consumption center in Chile, the plant is dedicated to mixing, packing, storing and distributing our finished products. From this plant, we deliver our products to more than 44.000 customers in Chile and to 10 exports destinations.

LINARES PLANT

Strategically located in the best agricultural region in Chile, our plant receives the products directly from the fields, and processes them through washing, cutting and freezing using the Individual Quick Freezing method. This plant enjoys state-of-the-art equipment recently acquired in Europe and US.
